SUMMARY

Senior Full Stack AI Engineer with 5+ years of experience designing, building, and shipping AI-powered products and scalable SaaS and fintech platforms for clients in the UK, the Netherlands, and Pakistan. Expert in Python, FastAPI, React.js, Next.js, Node.js, TypeScript, and PostgreSQL, with deep expertise in REST API design, microservices, event-driven architecture, system design, and cloud-native deployment on AWS with Docker and Kubernetes.

Delivers production Generative AI systems — Large Language Model (LLM) applications, Retrieval-Augmented Generation (RAG) pipelines, and agentic multi-agent workflows built with LangChain, LangGraph, and CrewAI on OpenAI GPT-4o, Anthropic Claude, and AWS Bedrock with Pinecone and ChromaDB vector search. Results include LLM automation that removed 60% of client manual workload, a 99.95% uptime SLA, and leading teams of up to 6 engineers.

SKILLS

AI & LLM Engineering

Generative AI, Large Language Models (LLMs), Agentic AI, AI Agents, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), Prompt Engineering, Embeddings, Semantic Search, Function Calling / Tool Use, Model Routing, Chatbots, AI Copilots, AI Automation

Frontend Development

React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, React Query, Tailwind CSS, HTML5, CSS3, Responsive Design, Component Libraries

Architecture & Patterns

System Design, Microservices, Event-Driven Architecture, Distributed Systems, Strangler Pattern, Clean Architecture, SOLID Principles

AI Frameworks & Models

LangChain, LangGraph, CrewAI, OpenAI API (GPT-4o), Anthropic Claude API (Claude 3.5 Sonnet), AWS Bedrock, Hugging Face, Pinecone, ChromaDB, Vector Databases

Databases & Data

PostgreSQL, MongoDB, MySQL, Redis, Databricks, Spark SQL, Apache Kafka, Schema Design, Query Optimization, Indexing, Table Partitioning, Multi-Tenant Data Architecture

Security & Authentication

JWT, OAuth2, Role-Based Access Control (RBAC), Multi-Tenant Authentication, API Security, Data Encryption

Backend Development

Python, FastAPI, Django, Flask, Node.js, Express.js, NestJS, Golang, REST APIs, GraphQL, WebSockets, Celery, AsyncIO

Cloud & DevOps

AWS (EC2, S3, Lambda, RDS, ECS, EKS, Bedrock), Microsoft Azure, Google Cloud Platform (GCP), Docker, Kubernetes, Terraform, CI/CD, GitHub Actions, ArgoCD, Nginx, Linux

Testing, Tools & Practice

PyTest, Jest, Unit, Integration & End-to-End (E2E) Testing, TDD, Swagger (OpenAPI), Datadog, Git, GitHub, Jira, Agile / Scrum, Code Review, Technical Leadership, Mentoring

PROFESSIONAL EXPERIENCE

Senior Full Stack & AI Engineer | Backend Architect

Jul 2025 – Present

10Pearls Pakistan

Onsite — Lahore, Pakistan

- Architected the core backend of an enterprise financial platform in Python and FastAPI on AWS, processing 3M+ daily transactions at sub-200ms p95 latency with 99.9% uptime; migrated batch workflows to Databricks and Spark SQL.
- Integrated LLM-powered automation (OpenAI GPT-4o and LangChain) into internal operations workflows, reducing manual review effort by ~40% on document-heavy processes.
- Lead a backend team of 5 engineers, owning code reviews, architecture RFCs, sprint planning, and release cycles; introduced PR standards and CI/CD quality gates that reduced post-release defects by ~35%.

Senior Full Stack Engineer & Team Lead

Nov 2022 – Jun 2025

Tech Domain

Remote — United Kingdom

- Promoted to Team Lead within 8 months; owned end-to-end delivery of UK multi-tenant SaaS products serving 50,000+ users across Europe.
- Built responsive React.js and Next.js (TypeScript) interfaces on Python (FastAPI, Django) and Node.js services, standardizing a reusable component library across product squads.
- Architected AWS cloud infrastructure on Kubernetes and Docker, achieving a 99.95% uptime SLA with zero critical incidents across the final 18 months.
- Led, mentored, and scaled a cross-functional team of 6 engineers; code review standards and automated test gates reduced the production bug rate by 45%.

Full Stack AI Engineer
Sep 2021 – Oct 2022

Sprinta Tech — *Remote — Netherlands*

- Sole backend engineer owning core platform architecture for a Dutch product company serving 3 European markets.
- Rebuilt the entire API layer in Node.js and PostgreSQL with schemas for 10M+ records, improving average response times by 50% and eliminating recurring production failures.
- Engineered multi-tenant authentication with JWT and OAuth2, adopted as the company-wide security standard; introduced code reviews that cut production incidents by 40%.

Full Stack Developer
Feb 2021 – Aug 2021

Micro Data Tech Solutions — *Onsite — Lahore, Pakistan*

- Built scalable full-stack applications with Node.js, Express.js, React.js, MongoDB, and PostgreSQL across a portfolio of client engagements.
- Designed secure RESTful APIs with JWT, OAuth 2.0, and RBAC; optimized queries and shipped Dockerized services via CI/CD on AWS.

PROJECTS

Agentic Customer Operations Automation
Tech Domain (UK)

Tech Stack: *Python, FastAPI, LangChain, OpenAI, Anthropic Claude, Pinecone, React.js, Next.js, Kubernetes, AWS*

- Designed RAG pipelines on Pinecone and multi-step AI agents automating customer operations for a 50,000+ user SaaS platform.
- Cut client manual workload by ~60% and sped up Tier-1 ticket resolution ~3x, becoming the platform's most-adopted feature.

Multi-Agent Document Intelligence Platform

Tech Stack: *Python 3.11, FastAPI, LangGraph, CrewAI, Claude 3.5 Sonnet, GPT-4o, Pinecone, PostgreSQL, AWS Bedrock, Kubernetes*

- Built a five-agent LangGraph pipeline for ingestion, classification, extraction, cross-referencing, and summarization of 50–300 PDF due-diligence packages per deal, with page-level citations.
- Routed Claude 3.5 Sonnet for long-context reasoning and GPT-4o for structured extraction, cutting intake from 2.5 days to ~6 hours and analyst effort by ~62%.

AI-Augmented Customer Support Copilot

Tech Stack: *Python, FastAPI, LangChain, GPT-4o, Anthropic Claude, ChromaDB, Redis, WebSockets, React.js, Zendesk API*

- Built a RAG copilot over B2B help-center content and Zendesk tickets with real-time WebSocket streaming.
- Reduced average handling time from 11 to ~4 minutes and raised Tier-1 first-response resolution to ~58%.

Enterprise Fintech Platform & Data Pipelines
10Pearls

Tech Stack: *Python, FastAPI, PostgreSQL, Redis, Databricks, Spark SQL, Docker, Kubernetes, AWS (ECS, RDS, Lambda, S3)*

- Architected a microservices backend processing 3M+ transactions per day at p95 below 200ms and under 0.1% errors, scaling PostgreSQL to 10M+ rows per table with partitioning and read replicas.
- Rebuilt legacy batch workflows as async Spark SQL and Databricks pipelines, cutting processing time 55% (4.2h to 1.9h).

Cloud-Native Microservices Migration

Tech Stack: *Golang (Gin), Node.js (NestJS), Kubernetes (AWS EKS), Apache Kafka, PostgreSQL, Terraform, ArgoCD, Datadog*

- Migrated a 200K-line Node.js monolith into 8 independently deployable microservices using the strangler pattern and Kafka-based asynchronous events.
- Managed infrastructure with Terraform and ArgoCD (GitOps), moving from monthly releases to multiple deploys per day.

AI-Powered ERP & Analytics Platform for Shopify Stores

Tech Stack: *Next.js, React.js, TypeScript, Python, FastAPI, PostgreSQL, Redis, Shopify Admin API (GraphQL), Webhooks, OpenAI, LangChain, AWS*

- Built a multi-tenant ERP for Shopify merchants to manage orders, inventory, products, customers, sales, and finances from one dashboard, synced in real time through the Shopify Admin API and webhooks.
- Integrated an AI analytics assistant (OpenAI, LangChain) that analyzes sales, inventory, and customer data and answers business questions in natural language.
- Delivered AI-driven recommendations, including restock alerts, sales-trend insights, and product and pricing suggestions, enabling data-driven decisions for store owners.

EDUCATION

Bachelor of Science (BS), Computer Science
2018 – 2022

University of Management and Technology (UMT) — *Lahore, Pakistan*
